

# DisinfectAir™

## Specifications

- 9.8"W x 5.12"H x 36"L
- 16 ga aluminum enclosure and reflective housing
- 11.5 lbs unit weight
- 100 CFM fan
- 50,000 hour expected lifetime
- 115VAC power source required
- 265nm peak UV-C wavelength
- 25W LED array
- 45W total operating power
- Replaceable dust filter

*Warning: UV LEDs emit invisible ultraviolet radiation when in operation, which may be harmful to eyes or skin. Do not look directly into the UV LEDs during operation.*

## Product Function

- Exchanges elevator air on average 6 times per hour, based on standard 2500# capacity 8' tall passenger cab
- Air circulated through reflector housing and exposed to targeted germicidal UV-C wavelength
- Produces no Ozone
- Keyswitch operation and indicator light options available
- Low profile fits easily within most cab ceilings
